

A photograph of two women standing side-by-side against a light grey background. The woman on the left is seen from the back, wearing a black, backless, spaghetti-strap dress with a long ponytail. The woman on the right is facing forward, wearing a black, spaghetti-strap, form-fitting dress. She has her hand on the shoulder of the woman on the left. At the top center, there is a gold textured rectangular area containing the text 'DR MATTEO VIGO' in black, with 'VIGO' in a larger font. Below it, 'PLASTIC SURGERY' is written in a smaller, white font.

MIA FEMTECH™
THE NEW PAINLESS
TREATMENT FOR BREAST
AUGMENTATION

It goes without saying that women's bodies are skin roadmaps under constant change. As time passes, we experience multiple transformations, and our breasts don't look and feel the same as when we were younger. The loss in breast volume or changes caused by breastfeeding are some typical examples. Similarly, some of us believe that our breasts are not well developed, and we want a quick and subtle change according to our busy lifestyle. It may be 1 or 2 cup sizes up so we can get rid of those push-up or padded bras.

No matter which transformation you're experiencing, the starting point is to reflect on the way you feel. Do we feel guilty for not liking our breasts? Do we feel superficial or insecure? Why are we unable to talk about breast health and aesthetics in a normal way? Surely, we shouldn't feel bad for wanting our breasts to look a certain way or even to be restored. Our bodies are our decision, and we should speak freely about our breast issues. Why? Quite simply because we're free women, but mainly because we're human beings.

Some of us are tired of compensatory behaviors and trade-offs regarding our discomfort with breasts, balance, and shape. We can agree that these methods may partially help, but they don't address the crux of the matter. So, what can we do to help you feel better?

First, we want women to be able to speak freely about breast health and aesthetics, to choose what is best for their body and mind, and to know how Mia Femtech™ solutions can contribute to making this journey more comfortable and enjoyable. Having said that, your right to decide or not decide is always with you.

Second, Mia® employs breakthrough technology that respects your body and busy lifestyle and results in a natural look and feel. We aim at proportion, balance, and breast harmonization, so you can feel fabulous

just the way you are. In particular, we shape your breasts in 15 minutes^{2*} for 1 to 2 cups sizes up, with a minimally invasive technology² and no general anesthesia³, so you can get on with your busy life the same day

Mia Femtech™ is the first ever injectable, biocompatible implants for 1 to 2 cups up, designed for a true natural look & feel.

WHAT CAN BE EXPECTED FROM THE MIA® PROCEDURE?

Experiences may vary between women, and because we each have different bodies, results will vary, but with Mia®, you can always count on:

- Breast harmonization for one to two cups up with natural and discreet proportional results
- Getting back to your busy life on the same day of your procedure
- A 15-minute procedure without general anesthesia
- An exclusive high-tech system for a patented minimally invasive procedure
- A breast tissue preservation technique with small, concealed scars

HOW OLD MUST I BE TO QUALIFY FOR THE MIA FEMTECH™ PROCEDURE?

Any woman over the age of 18 could be a candidate for the procedure. Please consult further with Dr. Vigo for further details.

HOW TO PREPARE FOR YOUR FIRST MIA® APPOINTMENT

1. Feel Supported Every Step of the Way

Long before your consultation day arrives, we'll be fully supporting you from start to finish. From the moment you step into your consultation, you'll have made the first move towards a one-of-a-kind, personalized experience. You'll be supported by Dr. Vigo and your Mia® Concierge, who will assist you on your entire journey, listening to your needs and learning about your lifestyle. Together, you'll develop a tailor-made plan to enjoy your experience as much as possible.

2. Relax and Get a Head Start

Make your peace of mind your highest goal! Prepare some 'only you' time. Block your agenda and get ready to pamper yourself. Arrive at your consultation with enough time beforehand to make yourself comfortable and ready to enjoy your experience.

3. Dive in and Do Some Research

Carry out your own research and browse our website to learn more about Mia®. You'll get familiar with the Mia® features and what you should expect from both the experience and procedure. This information will help sort out some of your questions and prepare you for your consultation day.

4. Talk Openly to Dr. Vigo

This key starting point enables you to achieve your desired look and feel. Plus, it will make you feel more confident with your Mia® Experience. Don't feel afraid to ask any necessary questions or to express any doubts and concerns.

5. Prepare for your Appointment

A checklist always comes in handy, so roll up your sleeves! Start by prioritizing your concerns while considering your medical history and any topics you'd like to discuss. Include your lifestyle activities and any other questions you may have. For instance, the desired breast shape and cup, what support you may require from your Mia® Concierge, warranty programs, and anything else you'd like to know. Bear in mind that there are no wrong questions, just the ones that are never asked. Remember, any relevant information you'd like to discuss is always welcome by your Dr. Vigo. Once in the consultation, writing some notes is advantageous and allows you to review this information in depth later.

6. Fly Solo or Bring a Companion Along

Some clinics allow consumers to bring a friend or a family member to their consultation. This can be helpful as your companion can remind you to make specific questions or allows you both to tag-team asking questions. This can also make you feel more comfortable. Alternatively, you may opt to go by yourself after sharing your questions with a trustworthy person before your appointment.

7. Unleash body harmony

Unwind and let the Mia® Experience surprise you with natural, discreet and proportional results. Stay true to your essence and delve into a new whole world of true harmony for body-mind balance!

BEFORE & AFTER

A BRIEF NOTE FROM DR. MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

“Because you deserve the best” is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.

Dr Matteo Vigo

Often regarded as the Best Plastic Surgeon in Dubai, Dr. Matteo Vigo graduated in Milan in 2004 and started his residency period in the Plastic Surgery and Burn Unit in Verona in 2005.

He worked in the Breast Unit where he developed his skills in breast reconstructive and aesthetic surgery together with the full spectrum of plastic surgery procedure.
