

A close-up, high-angle portrait of a woman's face, focusing on her eyes, nose, and lips. She has light blue eyes and is looking slightly upwards and to the right. A vertical gold-colored rectangular overlay is positioned in the upper center of the image, partially covering her forehead and the top of her nose. The text "DR MATTEO VIGO" is written in a bold, black, sans-serif font within this gold overlay, with "VIGO" being significantly larger than "DR MATTEO". Below "VIGO", the words "PLASTIC SURGERY" are written in a smaller, black, sans-serif font.

WHAT ARE **PROFHILO**
& **SUNEKOS**?

Profhilo improves overall skin texture and boosts hydration, giving your skin that radiant glow. While Sunkeos tightens the skin and improves fine lines and wrinkles.

What is Profhilo?

With one of the highest concentrations of hyaluronic acid (HA) available on the market, Profhilo is an injectable skin remodelling treatment designed specifically for those with thin, lifeless skin.

Profhilo's steady release of HA does more than just plump up and fill in wrinkles; it also encourages the synthesis of collagen and elastin, which improves skin tone, moisture, and the appearance of fine lines. An improvement in skin quality that lasts for up to six months is the outcome.

Because HA is hydrophilic—that is, it takes in and retains water from your body—Profhilo functions more like a hydrator than a filler. Because of this, it is excellent for those whose skin appears dull and weary, giving them firm, radiant skin. After therapy, this result appears three to five days later.

Skin tightening is the result of the subsequent weeks-long stimulation of collagen and elastin formation. This is helpful since, after the age of thirty, the skin's levels of collagen, elastin, and hyaluronic acid gradually decline, causing fine lines, wrinkles, and dull skin. Certain alterations are reversed by Profhilo.

Two treatments spaced four weeks apart are used to inject Profhilo just beneath the skin's surface. It improves hydration immediately after injection and doesn't require massaging or run the danger of developing lumps or nodules. Since profhilo is absorbed within a 2 cm radius of the injection site, a total of 10 injection sites are required to treat the face.

Profhilo improves overall skin texture and boosts hydration, giving your skin that radiant glow.

- Focuses on deep hydration and skin tightening
- Only requires two sessions every 3-4 weeks.
- Can offer sonic volume in the areas treated.
- Reduce the fine lines and wrinkles.

After two injectable treatments spaced four weeks apart, a single course of Profhilo should result in significant hydration. It brightens the skin,

reduces the appearance of fine wrinkles, and results in tighter, smoother skin. If necessary to preserve the outcomes, courses consisting of two treatments can be repeated every six months.

What is Sunekos?

Another injectable remedy is called Sunekos; it's a novel, clever injectable material that combines hyaluronic acid (HA) with a strong mixture of amino acids. These are essential components of moisturised and healthy skin. In order to restore the skin's vitality, young radiance, and health, Sunekos stimulates the fibroblasts in the skin, encouraging them to generate a complete mixture of collagen and elastin over the course of four treatment sessions every seven to ten days. Sunekos can successfully treat a variety of ageing problems, such as:

- Loss of skin tone and skin sagging
- Skin ageing
- Acne scarring
- Dark circles under eyes
- Sun damage
- Fine lines and wrinkles

Sunkeos tightens the skin and improves fine lines and wrinkles.

- Stimulates collagen production & skin rejuvenation.
- Requires 4 treatments every 14 days.
- Restores the skin's integrity.
- Targets sun damage and deep wrinkles.

A BRIEF NOTE FROM
DR. MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

"Because you deserve the best" is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.
