LIFTING & TIGHTENING
WITH RENUVION®

Are you a new mom? Achieved significant weight loss? Or simply ageing? One of the main causes of loose skin is the deterioration of collagen-rich tissue, which also leads to a decrease in the flexibility of the skin. In actuality, following liposuction, a lot of patients have undesired loose skin. Although liposuction works well to eliminate fat that won't go away, it can't treat loose skin that frequently happens with ageing or weight reduction. Sometimes the decrease in fat mass might make skin laxity worse. That is the function of Renuvion®.

The most dependable body contouring technology, Renuvion®, is made to tighten and lift skin at its source. Targeting that collagen-rich region, a Renuvion® wand is placed beneath the skin and uses a special mix of helium plasma and radiofrequency radiation. In a matter of minutes, the skin appears smoother, tighter, and lifted as a result of the energy contracting those collagen fibres and drawing the skin closer to the muscle.

Tiny 4mm broad incisions are used to introduce a single-use Renuvion® probe beneath the skin, and several passes are performed over the skin to obtain tighter skin. Skin tightening results from the precise release of radiofrequency energy and plasma into the tissue, which shrinks the tissue. More than 325,000 people have benefited from Renuvion®'s game-changing effects since 2017. Patients can witness a refreshed version of themselves in the mirror because to its long-lasting and robust benefits.

AM I A CANDIDATE FOR RENUVION?

Renuvion is a treatment option for patients who want skin tightening results, but do not want to do invasive plastic surgery.

No other minimally invasive technology will tighten the skin to this degree with such a:

- tiny incision
- little or no scarring
- minimal downtime

RENUVION COMMON TREATMENTS

Both women and men can undergo Renuvion treatment. However, it is most popular with women and the most common treatment areas are:

- Face
- Neck
- Breasts
- Stomach
- Arms
- Thighs

BENEFITS OF RENUVION FOR THE FACE

- Immediate skin tightening
- Improved skin elasticity
- Scar reduction
- Reduction and/or elimination of age spots, sun damaged pigment and freckles
- Reduction of wrinkles and lines caused by ageing and weight changes
- Tightening of loose skin in known problematic areas of the face
- Improvement of skin texture and tone around the lips, eyes, cheeks, forehead, jaw and neck
- Reduction of eye bags and crow's feet
- Reduction of acne and pigment issues (chloasma)

RENUVION CONSULTATION

During your consultation, Dr. Vigo will evaluate your skin elasticity, and your underlying muscle tone. He will thoroughly explain the technique along with its risks, benefits, and recovery times.

DOES THE PROCEDURE REQUIRE GENERAL ANESTHESIA?

Renuvion can be done under general anesthesia, sedation or even local anesthesia only for limited areas.

HOW MANY RENUVION TREATMENTS WILL I NEED?

Renuvion is a single treatment. You will start seeing results soon after surgery, but the skin continues to tighten over the next several months and up to a year as the skin remodels and deposits new collagen.

RECOVERY AFTER RENUVION SKIN RESURFACING

Although most patients are up and about at 2 weeks, there is still redness/erythema that lasts approximately 4 weeks. The energy penetrates deep into the skin for maximal result which does lengthen downtime. This is in contrast to Renuvion tightening where I have had patients go back to work within a few days. For limited areas, most patients only require a pain reliever during recovery.

RECOVERY & SIDE EFFECTS

Recovery from Renuvion procedures can take between two to three weeks depending on the extent of the procedure and the target area.

Larger body parts generally require more downtime and patients will feel more symptoms than that of smaller target areas. Patients should expect to experience symptoms for up to three weeks post treatment. These can include:

- Dry skin
- Peeling skin
- Mild pain
- Redness
- Swelling
- Itching
- Bruising

Medication can be taken to curb symptoms if at any point you feel uncomfortable. However, symptoms are very rarely severe and patients can usually return to regular light activities after two to five days.

It is common for patients to experience a 'tight' feeling in the area that has been treated as the sensation post treatment is different than before.

In addition, compression wraps can be worn day and night in the immediate recovery phase to help with the healing process and ensure a more comfortable resting / sleeping state.

However, every patient is different and no two are the same. So if you are feeling like you are experiencing more symptoms than you should, contact your clinician for assistance and advice.

The precision of the Renuvion® device wand, the ultra-controlled heat and the fact that Renuvion® doesn't require large incisions, this can all help to reduce the risk of this treatment, shortening recovery times and minimising scarring. Furthermore, research suggests that radio-frequency energy, such as that used in Renuvion® is able to deliver very similar results as with invasive surgery, but with far less risk.

DR MATTEO
VIGO

A BRIEF NOTE FROM
DR MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

“Because you deserve the best” is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.
