MIA FEMTECH™
THE BREAST
ENHANCEMENT
REVOLUTION

Mia® FemTech is a minimally invasive, natural-looking breast enhancement option for women who have never had breast augmentation surgery. It leaves no scars on the breast and doesn't require general anaesthesia. Amazingly, 90 minutes following the treatment, patients are free to leave the facility and get back to their regular lives.

Mia® FemTech is ideal for women who:

- Have had children and want to regain their pre-pregnancy confidence.
- Have never had surgery before and are seeking an increase in volume of up to two cup sizes.
- Have considered breast enhancement but were deterred by the scarring and downtime associated with traditional breast augmentation.

WHAT IS MIA® FEMTECH?

Created especially for breast enhancement, Mia® FemTech is a cutting-edge method in the realm of cosmetic surgery by Establishment Laboratories, the same company that makes Motiva Implant. It differs from conventional techniques in that it is less intrusive, aims for preserving the breast tissue, and requires a shorter recovery period. With the use of cutting-edge surgical instruments and technology, Dr. Vigo is able to precisely and safely execute breast augmentation procedures with a smaller incision.

HOW IS MIA® FEMTECH PERFORMED?

The Mia FemTech procedure involves several key steps:

Consultation and Planning

A detailed discussion of the consumer's expectations and goals during the consultation. Dr. Vigo assesses the anatomy of the consumer to decide on the best course of action.

Anaesthesia

The procedure is typically performed under local anaesthesia with sedation to ensure patient comfort.

Incision

Usually in the armpit, a small incision is made in a hidden place. Depending on the anatomy of the patient and the intended result, the exact site of the incision may change.

Placement of Implants

Dr. Vigo uses specific instruments and methods to make an implant pocket. The implants are then cautiously placed utilising a unique delivery mechanism through the tiny incision. The implants used are the first ever biocompatible injectable implants which with their diamond shape ensure a maximum projection with a minimal volume.

Closure

The incision is closed with sutures, and a surgical dressing is applied. The small size of the incision typically results in minimal scarring.

MORE ABOUT THE MIA® FEMTECH INCISION

The anatomy of the consumer and the intended outcome determine the size of implants that may be utilised with Mia® FemTech. Usually, the surgery is limited to one or 2 cup-sized increase in size. Traditional breast augmentation or MiniAugmentation treatments will produce the necessary effects if you would prefer a bigger increase in breast size.

HOW MIA® FEMTECH DIFFERS FROM A TRADITIONAL BREAST AUGMENTATION?

Mia® FemTech breast enhancement differs from traditional breast augmentation in several key ways:

mia
FEMTECH

WHAT'S THE DIFFERENCE?
BREAST HARMONIZATION vs BREAST AUGMENTATION

- Minimally invasive procedure
- Procedure only takes 15 minutes
- Minimal downtime

- General Anesthesia procedure
- 1 hour procedure time
- 1-2 week recovery time

Incision Size

Compared to previous procedures, which usually require bigger incisions to put the implants, Mia® FemTech employs a substantially smaller incision. However, if you're thinking about getting implants in a traditional way, we can often accomplish this with a 3-4 cm incision.

Recovery Time

Consumers frequently recover from Mia® FemTech procedures more quickly because they are less intrusive. Less downtime and a speedier return to regular activities result from this. There are minimal restrictions on the size and surgical plane of the FemTech implant process.

Scarring

The smaller incision used in Mia® FemTech results in less noticeable scarring, which is in the armpit.

Technology and Tools

Mia® FemTech uses a diamond shaped implant which provides more projection with a smaller size.

With its less invasive approach that may result in shorter recovery times and less scarring, Mia® FemTech is a significant leap in the area of breast enhancement. Like any surgical procedure, there are risks associated with it.

Mia® FemTech is for all those women who are looking for proportion, harmony and naturalness in their breasts.

A BRIEF NOTE FROM
DR. MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

“Because you deserve the best” is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.

Dr Matteo Vigo

Often regarded as the Best Plastic Surgeon in Dubai, Dr. Matteo Vigo graduated in Milan in 2004 and started his residency period in the Plastic Surgery and Burn Unit in Verona in 2005.

He worked in the Breast Unit where he developed his skills in breast reconstructive and aesthetic surgery together with the full spectrum of plastic surgery procedure.
